Career Objective

To work in a dynamic environment that allows me to gain and share knowledge while enhancing my skills in MERN Stack technologies. I aim to utilize my expertise in JavaScript, ReactJS, Node.js, and MongoDB to contribute effectively to the organization's success and achieve personal and professional growth. Seeking a challenging position in a technical organization where I can apply my abilities to deliver innovative web solutions.

Skills

Programming Language

JavaScript | Core Java

Frontend Technologies

HTML | CSS | JavaScript | React.js | Bootstrap

Backend

Node.js | Express.js

Database

MongoDB | Oracle SQL

Software Development Life Cycle (SDLC)

Waterfall Model | Spiral Model | Agile Methodology

Tools & Deployment Plateforms

- Version Control: Git, GitHub
- Deployment: vercel, Netlify

Courses

Intership Program: Full Stack Web Development, Edureka 🛮

- Gained practical experience in HTML, CSS, JavaScript, ReactJS, MongoDB, Node.js, and
- Built full-stack applications, including a **Zomato** clone project, using the MERN stack.
- Learned state management with Redux Toolkit and designed responsive UIs using **Bootstrap**.
- · Implemented authentication and deployed projects on **Vercel** and **Netlify**.
- Used Git and GitHub for version control and collaboration.

Projects

E-commerce web Application (MERN stack) 2024 Apr - present

- User Email Verification: Implemented OTP-based email authentication using Nodemailer to ensure secure user registration.
- Product Search: Built a user-friendly search feature to help customers easily browse and find products.
- Secure Payments: Integrated Razorpay payment gateway for safe and reliable online transactions.
- State Management: Managed application state efficiently using Redux Toolkit for a smoother user experience.
- **Responsive Design**: Designed the application to work seamlessly across various devices and screen sizes.

Portfolio Website (React)

- Responsive Design: Utilized React and CSS to create a mobile-friendly layout that adapts to different screen sizes.
- Dynamic Project Showcase: Implemented a dynamic project gallery with React components that display project details and links.
- Smooth Navigation: Developed a smooth, singlepage application (SPA) navigation experience using React Router.
- Dark/Light Mode Toggle with Local Storage: Integrated a theme switcher to toggle between dark and light modes, storing the user's preference in local storage to persist the mode across page refreshes.

Certificates

Full Stack Web Development Internship Certificate

- Edureka 🛮

Completed a comprehensive internship program covering HTML, CSS, JavaScript, ReactJS, MongoDB, Node.js, and Express.js.

Education

bachelor of Arts (Honors) in History, Gaya College, gaya 2020 - 2023 | Gaya, India
